Ideation Phase

Define the Problem Statements

Team ID	LTVIP2026TMIDS74706
Project Name	Empowering India: Analysing the Evolution of Union Budget Allocations for Sustainable Growth
Maximum Marks	2 Marks

Customer Problem Statement:

I am...

A policy analyst, researcher, government official, student, or citizen who is interested in understanding how the Union Budget is allocated across ministries, departments, and schemes — and how these allocations impact national development and economic priorities.

I'm trying to...

Analyze and compare budget allocations across financial years, identify funding trends, understand which sectors are prioritized, and make informed decisions or interpretations based on clear financial insights.

But...

I often face difficulty interpreting large, complex budget documents filled with extensive tables, technical terms, and scattered financial data, making year-over-year comparisons time-consuming and confusing.

Because...

Union Budget data is typically presented in lengthy reports and static tables without interactive visual tools, making it hard to quickly identify growth patterns, funding shifts, or sector-wise investment priorities.

Which makes me...

Feel overwhelmed, uncertain, and inefficient in extracting meaningful insights — leading to slower analysis, reduced transparency, and difficulty communicating financial findings to stakeholders or the public.

Customer Problem Statement

I am...

- A policy analyst, researcher, government official, student, or citizen wanting to analyze the Union Budget and understand its national impact.

I'm trying to...

- Compare budget allocations, identify trends, and understand sector priorities over financial years.

But...

- Face difficulty interpreting long tables, complex reports, and old-style, scattered data

Because...

- Budget data lacks interactive visuals making analysis slow and confusing.

Because...

- Budget data lacks interactive visual making analysis slow and confusing.

Which makes me...

- Feel overwhelmed, uncertain, and inefficient.
  - Slower analysis
  - Reduced transparency
  - Difficult to communicate insights.
